In The NightSide Of Eden

In love and lonely In love and lonely I'm not with you my baby Just to see you cry I'm in love with you Not the tears in your eyes I can't remember The last time you smiled Oh I know how it feels I know what it's like To be In love and lonely In love and lonely Don't what to do my baby It's not alright This can't be the end The time to say good bye No I won't walk away that easy After all this time Oh you know how it feels You know what it's like To be In love and lonely In love and lonely Oh you know how it feels You know what it's like You know how it is But you just can't stop crying In love and lonely In love and lonely In love and lonely In love and lonely
