Destruction And Terror

Hirax

Can you feel the power Vibrating all around Anarchy in the city Bad people all around

Shooting screaming people cut down
Killing bloodshed death all around
Running hiding this is a war
Caught in the middle the center the core

Destruction and terror taking the land Survivors together looting command Those who survive will become scavengers Killing each other and taking what's theirs

Ooh! People stop this hate Learn to love before it's too late

Lying stealing anything to live No food or water nothing to give Starving to death barely living Torture and pain to main it will bring
