

Scars

Hocico

Show me your vices
My vice is you
And it's destroying me deep inside

Show me your sickness
My cancer is you
And it's eating my inner cells insane

Show me your wounds
My wound is you
And it will open forever more

Show me your addiction
My addiction is you
And that's exactly what I refuse

All I need is what I get
You can have me is what you said
I can tell you what I've got
All is nightmares, all is false

It's eating me insane

My body is bruised,
My body is scattered
I wish you're dead,
I guess you're dead

Recall my name when nothing else stays
You'll never get the answers on old days
Recall my scars when you take off your disguise
While falling dreams are calling and taking your life
