

# Dissociative Disorder

Holy Moses

Periods of detachment from myself  
Breakdown from my hellish memory  
Extent interfering of my bodies functions  
Disrupted from my inner feelings  
Resulting from my head, looking for the dead  
Physical disorientation of my surroundings  
Experience of impaired recall of the past  
Confusion in my actual personality

The blood I bleed - we are one  
The blood I eat - we are two  
The blood I see - we are more  
The blood I feel - we are gone

Identity disorder of my own reality  
Mental decompensation in my certain thoughts  
State of temporary structural separation  
Subconscious strategy for powerful splitting  
Defensive mechanism to respond to hell  
Likely to be a marker of Satan's hand  
Indicating that they possessed my mind  
Weapons to kill overhoming events

The blood I bleed - we are one  
The blood I eat - we are two  
The blood I see - we are more  
The blood I feel - we are gone

The blood I bleed - we are one  
The blood I eat - we are two  
The blood I see - we are more  
The blood I feel - we are gone
