

Let's Get Wrecked

honeyhoney

We're holed up in Cleveland We got nothing else to do Except have bad intentions And what history tells us to I think it's time to finally cash that check Let's get wrecked, oh let's get wrecked

All these folks around us Say go get it while you're young Climbing heaven's ladder You can skip a couple rungs Think it's time that all our dues got paid Let's get laid, c'mon let's get laid

I black out the windows And he boards up the door I'm wound up with thinking And he sleeps on the floor He kisses like a masochist And I'm better off alone Being in love is harder than I ever could've known

We're shackled up in Nashville And the sky is coming down Kids back in the backyard All burning that sweet cloud Think it's time to default on that loan Let's get stoned, c'mon let's get stoned

Pulling at our jeans now honey We're biting at our necks Shouting both our names out Trying hard not to forget Hit it out the park on our first pitch Let's get hitched, oh let's get hitched

I black out the windows And he boards up the door I'm wound up with thinking And he sleeps on the floor He kisses like a masochist And I'm better off alone Grown up love is harder than I ever could've known

We keep digging deeper Sending someone else the bill Crying to our mommas When we can't climb up the hill Pushing panic away down deep inside We got pride, oh we got pride

I black out the windows And he boards up the door I'm wound up with thinking And he sleeps on the floor He kisses like a masochist And I'm better off alone Real love is harder than I ever could've known
