

Love Changes Everything

Honeymoon Suite

There was a time, I wore different face
I stood alone, feelings had no place
I've given it all, taking nothing back
You brought this lonely heart
Back in from the cold
Just like a fire, burning higher
You got my heart on a string
But now I know, love changes everything
I don't need money, don't need no fame
I gained only wisdom from so long in the game
I built such a wall, love was just too dangerous
Turned around you were right behind me
There to catch my fall
Just like a fire, burning higher
You got my heart on a string
Now I know, love changes everything
Just like a fire, burning higher
You got my heart on a string
But now I know, love changes everything
Only a fool believes in a heart of steel
Yesterday's behind me now, whoa, woh
Just like a fire, burning higher
She's got my heart on a string
But now I know, love changes everything
Just like a fire, burning higher
She's got my heart on a string
But now I know, love changes everything
Just like a fire, you got me burning
You got me on a string
But now I know, love changes everything
Just like a fire, you got me burning
