

Goodnight My Love

Honor Society

It's been quite a long year,
It's like we're being tested to face all our fears
So finally your mind will get some rest
And you'll feel much better
When your laying on my chest
I'll keep you right by my side
I feel you dreaming, close your tired eyes

Goodnight my love
I feel you drifting
Goodbye my best friend
This ain't no kind of livin'
Goodnight my love,
And I'll hold you one more time until tomorrow

While your deep in a dream
I'm awake thinking of what we could have been
Could I have done something better
And made some changes
But objects in the rear view mirror are closer than they seem
There's no use grasping
Things that are out of reach

Goodnight my love
I feel you drifting
Goodbye my best friend
This ain't no kind of livin'
Goodnight my love,
And I'll hold you one more time until tomorrow

Inside I'm dying
I don't wanna let you go at what we worked so hard at
Outside I'm crying
My heart won't admit, what my mind already knows
And it's getting light outside, so I guess I'll get up
Put on my clothes
And I kiss you one more time
So close your tired eyes

Goodnight my love
I feel you drifting
Goodbye my best friend
This ain't no kind of livin'
Goodnight my love,
At least I held you one more time until tomorrow
