

How Could You?

Honor Society

Honey could we just talk about us
A few things to learn about me
Don't be surprised when I ask of you
Just to get up and go and leave me

Don't want me, don't believe in me
Don't trust me, don't love me
How could you fool around with your love
And how could you toy around with your love
How could you fool around with your love

Waiting for all your sadness
What ever it takes to lift you up
Girl you're making a wish on an eyelash or two
That someday I'll want you
And you'll have found someone

Don't want me, don't believe in me
Don't trust me, don't love me
How could you fool around with your love
And how could you toy around with your love
How could you fool around with your love

Don't want me, don't believe in me
Don't trust me, don't you love me
How could you fool around with your love
And how could you toy around with your love
How could you fool around with your love
