

Escape

Hoobastank

Another day goes without any change
The feeling we live with still remains
We're stuck in a whole
And we're searching for anything to hold on to
There has to be somewhere that we can be safe
From the lives we live each day
There has to be somewhere that we can be far away

We have to escape
And I will go anywhere
If you just lead the way
Escape to a place where we'll be together
Together everyday
We have to escape

We could be living how we wanted to
Instead of doing things we're forced to do
With no one to tell us that we should be going through what they went through
There has to be someplace that nobody knows
Somewhere we can only go
There has to be someplace that we can be all alone

We have to escape
And I will go anywhere
If you just lead the way
Escape to a place where we'll be together
Together everyday

We have to escape
And I will go anywhere
If you just lead the way
Escape to a place where we'll be together
Together everyday
Together everyday

We have to escape (Escape)
We have to escape (Escape)

We have to escape
And I will go anywhere
If you just lead the way
Escape to a place where we'll be together
Together everyday

We have to escape
'Cos now we go anywhere
If you just lead the way
Escape to a place where we'll be together
Together everyday

We have to escape
