

I felt the radiance of your rising
Sunshine on my skin
Oceans away from the rest of our lives
And still we both fell in.
I was alone - I found you
So far from home - tell me
What else could I do ?

When you walked up to me
My world turned itself all inside out
You were like nobody else I've known
Hey, what are you about ?
Cold and alone - I was there
Ooh, what you've done
Do you know how much I care ?

I thought someday, somewhere, somehow...
But who am I fooling
Desiree will never ever know ... oh, no...
We could have tried something new, girl
But you lied, now I can't believe it's true
You knew I'd never find you

Maybe someday you'll change your mind
About what will ever be
Make it a day when the sun will shine
Again for you and me...
'Cause I can't shake you.
Desiree...maybe some day...
