

Blood Wars

Hoods

Every beating built my strength now you cower to my hate
One with no future I dissolve the one who forces pain you must
fall
You want the truth you live a lie with pain vengeance and beat
downs
You talk big led to false hope you led you lied just a fucking
joke
I trusted you full of shit I gave you took you lied now you die
From our first breath the first emotion's pain pain is addiction's
my slave
From our first breath the first emotion's pain now you die
