

You Can Love Me Now

Hothouse Flowers

You can lean on me anytime
You can take my hand, I don't mind
Never ever worry, yeah
It mightn't ever happen

On a darkness night, come to me
When you feel alone, let it be
We won't let it win, yeah
It mightn't ever happen

You can love me now
You can love me now
You can love me now
I'm feeling something real
You can love me now
You can love me now
You can love me now
Take take take take take take take me

When I look in your eyes, I can see
There is nowhere I would rather be
These are old wounds, baby, yeah
It might just happen
It might just happen
It might just happen
It might just happen

You can love me now
You can love me now
You can love me now
I'm feeling something real
You can love me now
You can love me now
You can love me now
Take take take take take take take me
