## You Can Love Me Now

## **Hothouse Flowers**

You can lean on me anytime You can take my hand, I don't mind Never ever worry, yeah It mightn't ever happen

On a darkness night, come to me When you feel alone, let it be We won't let it win, yeah It mightn't ever happen

You can love me now You can love me now You can love me now I'm feeling something real You can love me now You can love me now You can love me now Take take take take take take me

When I look in your eyes, I can see There is nowhere I would rather be These are old wounds, baby, yeah It might just happen It might just happen It might just happen It might just happen

You can love me now You can love me now You can love me now I'm feeling something real You can love me now You can love me now You can love me now Take take take take take take me
