

# One More Won't Hurt

Houston Calls

I'll down Keystones  
Drunk and alone planning things to say  
Saying things planned to empty cans  
Same shit different day

I've had enough to drink tonight  
Let's toast our glass to Christmas lights  
They're hung up on the wall in place  
I'm hung on your glowing face  
You've had enough to drink tonight  
Let's raise a glass to all the lights  
They're hanging above undisturbed  
I'm hanging on your every word

Stumbling around (you) find your way down  
We share spit all night  
Hard to pretend that we're just friends  
You'd be in headlights

I'll down Keystones  
Drunk and alone planning things to say  
Saying things planned to empty cans  
Same shit different day

Have you had enough?  
Have you had enough (to drink)?
