

## Fight On

Howard Jones

Got to get to know your mind  
Let it be your friend  
Don't be scared of what you'll find  
Let's not pretend

Say it isn't true  
You gave up on your dream  
Blinded by the spotlight  
Falling through the screen

You got to be strong  
You go to fight on  
For everyone

Hold a mirror to your life  
Polish night and day  
You can find the clear blue sky  
When the tarnish scrapes away

Hold on a minute  
Let me be your friend  
Strict as you want it  
Or gently take the bends

You got to be strong  
You go to fight on  
For everyone

There are times when the snowstorm hits  
And everything becomes a blur of cold and white  
Then you know that you must fight  
And believe that mountains shift  
And when the snowstorm lifts  
You'll see the sun and the moon so clear
