

## More You Understand

Howie Day

1000 years ago today  
We as two would be the same  
I'd fall for you  
Customized relationships  
Do you feel the same about  
Your flirt with love  
And your certainty

The CIA wouldn't bother you  
They would always know the truth  
They'd never know who came  
And I would fall 1000 miles  
And you would fall fast to denial

The more you are  
The more you need  
The more you understand  
The more you understand  
The more you know  
The more you feel  
The more you understand

The sentiments are screaming out  
The felony of who's left out  
It's not you  
You for me - me for you  
We can always follow through  
This makeshift date  
But why give up your love

The way it goes  
Call her name  
Do you ever feel the same  
And do you know who came  
A year ago 1000 miles  
How far away we are to smile  
Too far gone to save

You'll know  
The CIA is after you  
What the hell is there to do but run  
We made  
A promise to eternity  
Tucked away for you to see  
On you're way you'll be  
Baffled by relationships  
Psyched up for the major lift  
What you want to say  
You're caught to blame  
They erased your name  
We will always be the same  
The same
