Hozier

Just a little rush, babe
To feel dizzy, to derail the mind of me
Just a little hush, babe
Our veins are busy but my heart's in atrophy
Any way to distract and sedate
Adding shadows to the walls of the cave

You and I nursing on a poison that never stung Our teeth and lungs are lined with the scum of it Some whiff of this death and guts We are deaf, we are numb Free and young and we can feel nothing

Something isn't right, babe
I keep catching the words but the meaning's thin
I'm somewhere outside my life, babe
I keep scratching but somehow I can't get in
So we're slaves to any semblance of touch
Lord we should quit but we love it too much

Sedated we're nursing on a poison that never stung Our teeth and lungs are lined with the scum of it Some whiff of this death and guts We are deaf, we are numb Free and young and we can feel nothing

Darlin', don't you, stand there watching, won't you Come and save me from it Darlin', don't you, join in, you're supposed to Drag me away from it

Any way to distract and sedate
Adding shadows to the walls of the cave

You and I nursing on a poison that never stung Our teeth and lungs are lined with the scum of it Some whiff of this death and guts We are deaf, we are numb Free and young and we can feel nothing

Sedated we're nursing on a poison that never stung Our teeth and lungs are lined with the scum of it Some whiff of this death and guts We are deaf, we are numb Free and young and we can feel nothing
