

# One Burning Desire

Hugh Cornwell

I'm gonna try and steal a car  
Drive it off with you somewhere afar  
I'll start a fire deep inside  
Find a place where we can hide  
And as life flashes by  
You want to know the reasons why  
I'll be there with words to take you higher  
One burning desire

I'm gonna try to be a light  
Set the world on fire day and night  
We start an education here  
The signs look good no need to fear  
The other people come and go  
Why play the scenes they only know  
I'll be here to help you walk the wire  
One burning desire one burning desire  
One burning desire

I want to get inside your head  
Find your ma and pa and what got said  
And as we get familiar too  
Find every scar and small tattoo  
And as we start to play the game  
I'll confess and take the blame  
But you're the one who poured fuel on the fire  
One burning desire one burning desire one burning desire  
One burning desire
