

On The Ledge

Hughes Turner Project

Stare out my window until the light fades
The darkness overcome me
Someone is lost, someone is saved
I wonder which one will I be

Searching for something, just what I'm not sure
Some way to change my life
One thing's for certain, can't take this anymore
I feel like I'm losing the fight

How long have I lived this way
Alone in the atmosphere
I see you but I'm 10,000 miles away

Gotta turn it around, I'll be walking tall
I'm gonna try and keep my head
It's a long way down, so far to fall
When you're standing on the ledge

A burning heart full of broken dreams
Trapped inside my frozen soul
A desperate man, he goes to extremes
Before he loses control

Lost my faith in heaven and my fear of hell
There's no place that I belong
Don't want your pity, save that for yourself
I know what it takes to be strong

How long have I lived this way
Alone in the atmosphere
I see you but I'm 10,000 miles away

Gotta turn it around, I'll be walking tall
I'm gonna try to keep my head
It's a long way down, so far to fall
When you're standing on the ledge
On the ledge

How long have I lived this way
Alone in the atmosphere
I see you but I'm 10,000 miles away

Gotta turn it around, I'll be walking tall
I'm gonna try to keep my head
It's a long way down, so far to fall
When you're standing

Gotta turn it around, I'll be walking tall
I'm gonna try to keep my head
It's a long way down, so far to fall
When you're standing on the ledge

On the ledge
On the ledge
On the ledge
