

Dreamboat

Hum

You swore the earth was round
And you said that there was no upside down
I hit the starship left and let the parallax flip
Like you showed me in the lighthouse

I did the math and it came up ones and 0's
I know a girl who makes me shine
My dreamboat's leaving on a submarine
She's got a second set of tanks and all I ever want and need

I know a girl that makes me whine
My dreamboat scatters with her submachine
She's got a second set of tanks
And all I'd ever want or need

And you swore the earth was sound
And you said that we could go upside the ground
But the starfish sends a message in code that you can't see from
The

Lighthouse
And we will dive in the afternoon.
I took a simple time to wander
Engaging twilight through the trees

If she needs help among the kelp ways, then I'm not tied to
These
No I'm not tied to these
I know a girl who makes me shine

My dreamboat's leaving on a submarine
She's got a second set of tanks
All I'd ever want and need
And to the one who makes me whine

My dreamboat scatters with her submachine
She's got a second set of tanks and all I ever want or need
For me
