

All Day

Human Highway

All day, all day
Got no worries, let the day waste away
Let the sun soak through
And do what we wanna do

True, but we've got nothing to do
Waiting for our ship to come in (so we can sink)
Something has to happen cause its later than you think
There's got to be a way, cause nothing seems to last

You, keep on telling me to
Loosen up, you're like a disease
Tell me its okay, neglect my negativity
Oh Jimmy won't you please, I love it when you say

So it's through, its all over and what did we do
Walked around in a daze looking for food
Your fingers are the tide in the ... knot
Keep on telling ourselves we've got
