

# It's Gonna Be A Long Night

Human Nature

It's Gonna Be A Long Night  
Girl I can see you've been crying  
I know your feeling alone  
I want you to know I've been trying  
To show you what you've never known

Baby, just open the door into your life  
Just say goodbye to your loneliness tonight

Whereever you want to be, I'll take you  
Whatever you want to see, I'll show you  
So baby believe in me, I'll make it right  
It's gonna be a long night

(Whatever you want  
Whatever you need  
Whatever you want)

Life is too short to be wasting  
Every moment alone  
Why are we here hesitating  
Baby come on and just let it go

Give me a chance let me open up your life  
Every step that you take I'll be by your side  
You know it's gonna be a long night

Whereever you want to be, I'll take you  
Whatever you want to see, I'll show you  
So baby believe in me, I'll make it right  
It's gonna be a long night

(Whatever you want  
Whatever you need  
Whatever you want)

Baby, just open the door into your life  
Just say goodbye to your loneliness tonight  
You know it's gonna' be a long night

I can give you all you want and  
I can give you all you need and  
Whenever your feeling lonely I'll be by your side  
It's gonna be a long night

Whereever you want to be, I'll take you  
Whatever you want to see, I'll show you  
So baby believe in me, I'll make it right  
It's gonna be a long night

I can give you all you want and  
I can give you all you need and  
Whenever your feeling lonely I'll be by your side  
It's gonna be a long night
