

## She's Back

### Human Nature

Took some time to heal  
To get my heartbeat back  
Just when I'm ahead  
Returning from the dead  
She's back again...  
She knows just what to say  
She always gets her way  
Just when I was free  
She's back inside of me  
She's back again

So tell me why the hell I hear music  
Every time she calls I hear music  
Is it just the way she loves to confuse me  
Oh baby  
Just when I moved on  
Believed that she was gone  
She's back again...  
She's back again  
Like a predator and prey  
She'll tear my heart away  
She'll chew me to the bone  
Leave me rotting here alone  
'Til she's back again

So tell me why the hell I hear music  
Every time she calls I hear music  
Is it just the way she loves to confuse me  
Oh baby  
Just when I moved on  
Believed that she was gone  
She's back again...  
She's back again  
Like a predator and prey  
She'll tear my heart away  
She'll chew me to the bone  
Leave me rotting here alone  
'Til she's back again
