

# Blood Sisters

Huntress

Secrets we keep 'til death  
I promise you, I swear to you  
Burn out 'til nothing's left  
You know the truth, it's all for you

Hiding the things we do  
Torture me, I won't confess  
We took an oath for life  
My little murderess

Carving my name on your arm  
I won't keep you safe from harm

Running away, laughing at the broken past  
Open your mouth girl, this kiss is gonna last

Blood sisters forever  
Blood sisters

Falling asleep in cars  
The morning light, destroys the night  
Freedom is paved with scars  
We live in gray, not black and white

Famous and living free  
On TV screens and radio  
Sirens will soon foresee  
The encore of our show

Cutting your long jet black hair  
I'll hold it tight on the death chair

Running away, laughing at the broken past  
Open your mouth girl, this kiss is gonna last  
Running away, never look back  
Swear on your last breath,  
Out love is gonna last

Blood sisters forever  
Blood sisters
