

Baby Blue

Hurray For The Riff Raff

Heading south
On your father's train
What do I do
With a man like you?
We curse and we fight
We make love all night
What do I do
With a friend like you?

Well you my friend have gone away
And you can't stay
No you can't stay
You can't stay with me
Well the willow weeps and dove does cry
And love does die, yes love does die
But our love will never die

I need you more
Than I did before
But now you're gone
Just left me with a song
I'll remember you
My Baby Blue
The biggest fish
In the whole damn pond
