

# Policewoman

Hurts

I said I'd call the policewoman  
If these nightmares didn't stop coming  
When she passed by, I didn't ask for nothing  
Except her time and that was good enough for me

There's panic on the streets outside of this dirty old town  
A coat of silence feeds the violence all around  
But I see her boots shine bright  
The bullets burn the heavy sky and they cower out of fear  
My policewoman

When I hear those sirens coming  
My iron maiden's running  
To serve and protect my love  
And the lights shine red and blue  
I see those vandals running  
My iron maiden's coming  
She whips her nightstick  
And my heart shines red and blue

There's still a stone cold fear in this neighborhood  
I tried to call, but it was no good  
A policeman came, he said the news was bleak  
She caught a bullet in the back  
Trying to rescue these streets

When I hear those sirens coming  
My iron maiden's running  
To serve and protect my love  
And the lights shine red and blue  
I see those vandals running  
My iron maiden's bleeding  
She fights for life  
And the lights shine red and blue

My policewoman  
My policewoman  
My policewoman  
My policewoman

When I hear those sirens coming  
My iron maiden's running  
To serve and protect my love  
And the lights shine red and blue  
I see those vandals running  
My iron maiden's bleeding  
She fights for life  
My policewoman

She protects me from the pain  
She protects me from the pain  
From the pain, from the pain, from the pain, from the pain  
From the pain, from the pain, from the pain, from the pain
