Down, down, deeper and down her young heart falls to the ground why, why, whispering why does the choir boy sing - does the choir boy sing

And she cries all night come to my rescue but he's out of her life

It cuts like a knife there's nowhere to hide she's losing the fight she runs from the pain a wound will remain and follow her through

Time, time, healing time
will you come and ease her mind
shame, shame, who is to blame
for the state she's in
- for the state she's in

And she cries all night come to my rescue but he's out of her life

It cuts like a knife there's nowhere to hide she's losing the fight she runs from the pain a wound will remain and follow her through

Will follow her through she's hurting for you how could you use a young heart so true

Chorus...

Down, down, deeper and down her young heart falls to the ground
