

Download your outlook  
Uplink your input  
Flip the kill switch  
It's the golden glitch

Is your cable stable  
Are you willing and able?  
To go and face the fire  
My digital wire?

You get the wire and I'll get the digital  
We got the science, so let's get metaphysical  
Who dropped the knowledge, I need to pick it up  
I got a fire in my wire and it don't give a fuck

Duck, duck, goose no excuse to run around  
Gigawatt spot stopped and came to get down  
So when you're burnin' and returnin' don't go too fast  
Might use you up and you just might crash

I don't wanna die or be left behind  
But it's all moving too fast  
And you don't want the truth just something new  
And now you're about to crash

Reboot your mind state  
Hurry up and then wait  
Find your function  
Digital corruption  
Software or hard  
My screen is scarred  
Computer consumed  
Will spell your doom

Doom fills the room as boom fills the speaker  
Get upset when the tech tries to play you like a tweaker  
Freak a beat when it's sweet and come numb when it's dumb  
It's all about where you at so fuck where you from  
Look what you took and thump what I bump  
I got a rhyme full of reason and pocket full of funk  
Skip the greed, what you need is a vision of self  
'Cause sellin' earth for some turf is bad for your health
