

## Dark Star

Hypnogaja

I saw it all  
All along  
When I looked again  
It was almost gone

Fragile sky  
Seemed so strong  
Was it destiny  
That brought this on?

I can see your light fading  
The night is contemplating  
Will you shine on  
Or is it too late?  
Darkness casts a shadow brightly  
I see the same inside me  
Your reflection  
Shows me my fate

Dark star  
Fading faster

I feel your pain  
Come closing in  
'Cause what happens next  
Will happen then

Scared to die  
I won't pretend  
More than anything  
I'm afraid to meet your end

I can see your light fading

Dark star  
Fading faster
