

# To Rebuild

## I Am Abomination

Put on your cap and your boots  
We're gonna build this city  
These times are rough  
But we're drawing it up  
The skies are filling with our brilliance  
Tearing away from all the clutches of poverty

Uneducated adolescent nation  
Without reserve we start the purge  
Economic collapse has just inspired the masses  
To be creative not be destroyed

To follow through is to abolish the hunger and equal the upper  
Not a single hand  
Left unblistered in the end

Three cheers for the state of the state  
We're higher than all  
Not a muscle left untorn  
Not a dollar left unborn

Inspiring static minds  
Mechanizing powers yet defined  
With a touch of innovation  
We establish domination  
Over all who wish to vie

Brilliant minds  
Introduce the facile times  
Not a worry in the world  
The key to life  
Washes up in the tides  
Of electron exercise

To follow through is to abolish the hunger and equal the upper  
Not a single hand  
Left unblistered in the end

Three cheers for the state of the state  
We're higher than all  
Not a muscle left untorn  
Not a dollar left unborn

This flag flies above the reinvented  
Shadows cast as we tip our hats

What a beautiful way to live destroy  
The old design and implement the new idea

To follow through is to abolish the hunger and equal the upper  
Not a single hand  
Left unblistered in the end

Three cheers for the state of the state  
We're higher than all  
Not a muscle left untorn  
Not a dollar left unborn
