

## Hammers & Anvils

I Am Empire

This cloud that floats above me is getting old.  
It's been years and years and years of cold hard rain  
But only few have ever really seen my pain  
I can never see the sun shine  
Unless it's glowing off small kids with their big dads  
Oh that's something that I've never really had...  
How I wonder if I did would I be glad

Rain down your hammers and anvils  
Lets build something great for the world to see

I hit the floor, hurt more than I ever expected.  
Thought I was only supposed to get what I deserve  
Did anyone see that fracture in my nerve  
Oh it's hope that has embraced me  
And my God who wont forsake me  
Sweet Jesus your amazing  
You save me every single time I fall down

Rain down your hammers and anvils  
Lets build something great for the world to see  
It's Raining hammers and anvils  
Lets build something great for the world to see

It's simple things I keep forgetting  
A loud voice to know the cloud above my head is soon to pass  
This Joy is not impossible  
So forget all the improbable

Rain down your hammers and anvils  
Rain down your love

Rain down your hammers and anvils  
Lets build something great for the world to
