

Fingerprints

I Am Kloot

If heaven is a place upon your skin
that I may have touched
from without to within
well then dust yourself for fingerprints
and grin, and grin

Cos we don't have to stay
with these people whose ideas
are just what other people say
we can walk away from these feelings
that are filling up our lives with days

And I guess that I've been singing all my life
well that's right, and that is fine
I've been spending all your money and your time
well that's right, and that is fine

Cos I don't have to stay
with these feelings that are filling up my life with dates
I can walk away
from these people whose ideas
are just what other people say
again and again

And the crowd that is gathering's confused
we're all trembling inside solid shoes
we've got nothing left to use
we've got all the bullets
but there's no-one left to shoot

And we can't walk away
from these feelings that are filling up our lives with dates
we may have to stay
with these people whose ideas
are just what other people say
again and again

Well if heaven is a place upon your skin
that I may have touched
from without to within
well then dust yourself for fingerprints and grin
and grin, and grin

I guess that I've been singing all my life
well that's right, and that is fine
I've been spending all your money and your time
well that's right, that is fine
