

Listen Lesson / Keep Away

I Can Make a Mess Like Nobody's Business

I've seen enough to realize
I'm working on a puzzle in crime
And every single lead finds me closer to explode
I finally have a secret that everybody has to know
Close your eyes and see the place where everything's not a mystery
Cut your ties and lead the way stomp your feet to a better day
Hold your plans play keep away why on earth do we have to wait
Realize it's all the same nothing simple will every change
The resin in the tree line is the filling from your teeth just bone white
Biting into leaves might cause them to erode
You're feeding off my weakness now everybody has to know
Close your eyes and see the place where everything's not a mystery
Cut your ties and lead the way stomp your feet to a better day
Hold your plans play keep away why on earth do we have to wait
Realize it's all the same nothing simple will every change
