No one notice when the world became to change
To one bright we start to go, we done the planes
Now I don't wanna be the one how doesn't live to see the end
So I just smile and pretend

Call back your friends
Call all your saviors
When you get on dance
Call and get truth your sermons to make on you

No one notice when the world became to change
To one bright we start to go, we done the planes
Now I don't wanna be the one how doesn't live to see the end
So I just smile and pretend
