

Save World Get Girl

I Fight Dragons

Surrounded, in the thick of it Nowhere to runaway, not today
Outnumbered, that's the trick of it No more to lose, and so here
we go now Don't turn around, we wanna show Time has run out, do
n't let us down

Woah-o-o You save the world Woah-o-o You get the girl No more
waking up finding that you're not enough for everyone You save
the world

Keep moving, now you started it It's all come down on you, what
to do Find something at the heart of it That tells you where to
go, even though now They found you out, your covers blown The
future's in doubt, you're on your own

Woah-o-o You save the world Woah-o-o You get the girl No more
waking up finding that you're not enough for everyone You save
the world

If you could do anything you want to Would you cut through or
would you decide to let it go

Woah-o-o You save the world Woah-o-o You get the girl No more
waking up finding that you're not enough for everyone You save
the world
