## **Embrace The Curse**

I am a hologram I am the ghost that's laying next to you Watching you breathe I am a wanted man Feels so electric as they're chasing me Still I can't sleep

It's me against the world today And that's fine It's me against the world

And so I stand I embrace the curse I embrace the song I embrace what I feel When I feel what's wrong I embrace the hurt The hate and what's worse I embrace what I am I embrace the curse

Tonight is our escape Today integrity is killing me Still I can't see The choices that we make Are not the choices they want us to make Who asked them anyway

It's me against the world today And that's fine It's me against the world

And so I stand I embrace the curse I embrace the song I embrace what I feel When I feel what's wrong I embrace the hurt The hate and what's worse I embrace what I am I embrace the curse

I know you know exactly what I mean I know you know what I feel I feel, I feel, I feel, I feel

It's me against the world today And that's fine It's me against the world

I embrace the curse I embrace the song I embrace what I feel When I feel what's wrong I embrace the hurt The hate and what's worse I embrace what I am I Hate Kate

I embrace the curse

I embrace the curse I embrace the song I embrace what I feel When I feel what's wrong I embrace the hurt The hate and what's worse I embrace what I am I embrace the curse
