

# It Will Be Up (High School Never Ends)

I See Stars

I'm in the back right corner table eating alone  
As her eyes are eating away at me  
Years later I'm driving on the side of the road  
Lustful stare haunts me everywhere

High school never ends  
The road's a bigger hallway where awkward waters meet  
On a river running red the current's taking me farther and farther away

It will be up  
It will be up to them  
To cast you out and make you feel worthless  
Congratulations to the class of two thousand fail

Take it back now take it back  
You might regret the words  
Coming out now so just bite your tongue  
You know it's really not like me to give you the third degree

If high school never ends  
Why are you look at me  
Just a face on your tv  
Cheers to all of those who said you won't make it  
Very far to those who weren't seeing stars

This is our chance  
To show them all  
What we're made of!

It will be up  
It will be up to them  
To cast you out and make you feel worthless  
Congratulations to the class of two thousand fail

This is our chance  
To show them all  
What we're made of  
In these  
Hallways  
Dreaming  
Always

The nightmares never come to an end  
And there they go marching in single file  
Do they even know what's in store for them?

What do you know oh oh oh oh oh oh oh oh oh oh  
I know that high school never ends  
High school never ends ends ends

It will be up  
It will be up to them  
To cast you out and make you feel worthless  
Congratulations to the class of two thousand fail
