I See Stars

You won't see me die here!

You always say I need to get as far away as I can  
While I've got time to play with and any risk, I'll take it  
Or fade away in this suburban wasteland and watch all your plans sink right  
under your feet  
Sink right under your feet  
Watch all your plans sink right under your feet

Under your feet is the ground to break  
You only get what you take  
So don't just sit and watch the atrophy of it

I have stood back for way too long  
You are broken... You are so broken!

I can see that  
We may be running out of time  
The curtain's falling in slow motion  
I can feel that the sense has left your mind  
The curtain's falling in slow motion

Why did you go? I can't watch  
So quiet and peaceful where did I go wrong  
Say you can stay I can't look away

You won't see me die here  
You won't see me die here!

Now! Now!  
Do you hear me now?  
Screaming at the top of my lungs all night  
Now! Now!  
Do you hear me now?  
Screaming at the top of my lungs all night  
Why? Why?  
Ask me why?  
Go ahead and act like you... don't know why  
Why? Why?  
Ask me why?  
I'll scream it... you blow me away

You blow me away  
You blow me away

Can you give me my breath back? (4x)

Do you hear me now?  
Screaming at the top of my lungs all night  
(2x)

Do you hear me now?
