

Sing This!

I See Stars

I see stars
Bizzy Bone

Come on girl, you've got one shot to be with me
You know you drive me crazy,
But I know how to take your breath away so let's go

Well I don't care what's going down here
You can see me, and I can see you
So let's cut this game, we both feel the same
And I'll show you enough I'm used to

And all you do is run through my head
Are you getting tired yet?

Everyone's jumping up and down,
I'm staring at the crowd,
And the dream girl's singing the words
And she looks like she needs me

And dance with me
And I'll show you what you're missing
And everybody in the town,
Put your hands up all around
And sing this, let's sing this

Everyone's jumping up and down,
I'm staring at the crowd,
And the dream girl's singing the words
And she looks like she needs me

And dance with me
And I'll show you what you're missing
And everybody in the town,
Put your hands up all around
And sing this, let's sing this

Everyone's jumping up and down,
I'm staring at the crowd,
And the dream girl's singing the words
And she looks like she needs me

And dance with me
And I'll show you what you're missing
And everybody in the town,
Put your hands up all around
And sing this, let's sing this
