

# Still Not Quite Enough

I See Stars

Right now I'm feeling right  
Tonight's my night  
And it's so good to see you all  
Lighting up the rooms on the floor  
Up on the balcony a site to see I'm coming I'm running I'm wondering  
If you wanna spend the rest of my life with me

And I know we all just want the world to keep on spinning  
It's still not quite enough  
Stop us from dancing  
It's still not quite enough  
No the bass that will never stop  
This is where wanna be  
You will spend this night with me.

We're over here  
Now who's with me  
Show this place one good time  
Played in the streets now  
Show this place one good party

But you will do me in  
And scream without a care  
Not impress  
Let's do our best to live it up

And I know we all just want the world to keep on spinning  
It's still not quite enough  
Stop us from dancing  
It's still not quite enough  
No the bass that will never stop  
This is where wanna be  
You will spend this night with me

I traveled the world  
But it's still not quite enough  
For the first time in my life  
I feel like you could be enough

It's still not quite enough!

I traveled the world and I know it's still not quite enough  
For the first time in my life I feel you could be enough  
It's still not quite enough

I traveled the world  
But it's still not quite enough  
For the first time in my life  
I feel like you could be enough
