Captured In Your Dreams

Ian Thomas

Close your eyes and all the things that you knew Places you've been and faces you've seen Will look right back at you Memories behind you are much closer than they seem All around you, all the time They're captured in your dreams Drift away until you're floating on a sea Get to feeling dizzy Feeling weak around the knees Then when you look up and the world begins to lean Say hello to everyone, who's captured in your dreams Ah And while you're there if it won't take you too long Go back and do right what you know you've done all wrong Drift away until you're floating on a sea Get to feeling dizzy Feeling weak around the knees And while you're there if it won't take you very long Go back and do right what you know you done all wrong Ah Oooh ooh ooh.... Ooh ooh ooh...
