

Come 2 Me

Ian Van Dahl

The first time that I saw you You blew my mind

You made me take a look inside I couldn't hide

Never thought I could feel this way About someone

I don't know much about life But I know you're the one

Come to me

So come to me I like to be the one you need So come to me Then
you will see what you mean to me Please come to me

My heart has been broken So many times

But you turned darkness into light You made me smile

Never thought I could feel this way About someone

I don't know much about life But I know you're the one

Come to me

So come to me I like to be the one you need So come to me Then
you will see what you mean to me Please come to me
