We Ate Gilbert's Grapes

Ice Nine Kills

Shotgun
I called as we were running out
We were the kids they'd never talk about
We were dumb
No we were out of control
We soon got reputations
Which fueled their accusations
We knew enough to know we didn't belong

So you better be careful
Because we won't be handed a lie
And it seems to me

That I'm running on no sleep
My problems were knee deep
But I think I fell way over my head
And I'm still thinking about the times when we were
young
To think I thought things would work out fine
If we were wrong than no one's right
You think you know me
But you don't know me anymore

Well back then we were calling all the shots out
Trying not to drop out
Waiting for our chance to escape
I'm trying to remember those days
But it's all just a haze

And we were the first ones to start shit
Even if we'd get our ass kicked
I hoped we'd go before they'd match us
Cause we were desperate and they had got to got to know

But in the back of my mind there's a hole
These drugs keep driving but my head pays the toll
If I had listened I wouldn't make mistakes
I've lost the feeling and it's time that they know
So here I go
Here I go
