

# Nightmares

Iced Earth

The feeling that you get when we creep inside  
You won't see us there, you won't feel our stare  
But when we're next to you we do all we can do  
To get the cold sweat out, watch you squirm about  
And as you try to move we grab and strangle you  
With all of your deceit and our reality

Night  
Nightmares  
In the night

Hell is coming down, your fate has turned around  
Too scared to make a sound  
Now you're frozen there in your human shell  
It's a nightmare I am the god of fear

Night  
Nightmares  
In the night
