

## Love Like Blood

Icehouse

We must play our lives like soldiers in the field  
But life is short I'm running faster all the time  
Strength and beauty destined to decay  
So cut the rose in full bloom  
'til the fearless come and the act is done  
A love like blood, a love like blood  
Everyday through all frustration and despair  
Love and hate fight with burning hearts  
'til legends live and man is god again  
(and self-preservation rules the day no more)  
We must dream of promised lands and fields  
That never fade in season  
As we move towards no end we learn to die  
Red tears are shed on grey
