

...And an avalanche falls a mountain slide  
Earth tremors an earthquake and people fall inside  
A volcano erupts sky high and people die  
And friends and relatives gather and cry  
People always die  
People always cry  
People always die, we all die in the end  
And as sure as this is to be expected  
We see war as natural, a land to defend  
Bent life and early death is factual and national  
Virus infected  
Gratefully accepted  
We see the cruelty of death continually  
Who needs war and it's insanity?  
Media glorifies and poorly justifies what we die for  
R.I.P. with fables from a bible  
Carefully selected  
Hypodermic lies syringed at birth  
Forever believed and blindly accepted  
From thereon aided and abetted  
Already pussing this virus needs sussing  
Virus infected  
Virus injected
