Forever

Idina Menzel

We thought we had it all We thought we'd go unscathed We thought our love Would border on infinity

We thought that we were free The world would disappear We left ourselves wide open And we had no fear

But forever came and went Forever stumbled through Forever had poor sense of time And made a mess of me and you

Forever had us fooled We fell for it again And now time is standing still Forever

Lying next to you But you're already gone And too much has been said And it can't be undone

It's so hard to comprehend When ashes fade to dust I touch your water And the iron turns to rust

So forever came and went Forever stumbled through Forever had poor sense of time And made a mess of me and you

Forever had us fooled We fell for it again And now time is standing still Forever came and went

We thought it had it all We thought we'd go unscathed We thought our love Would border on infinity

But forever was a shame It stole a little piece of us To live up to it's name Was really just too much

And forever came and went Forever stumbled through Forever had poor sense of time And made a mess of me and you

Forever came and went Forever stumbled through Forever had poor sense of time And made a mess of me and you

Forever had us fooled We fell for it again And now time is standing still Forever came and went

(Forever, forever, forever)
Oh, I thought we had it all
 (Forever, forever, forever)
Oh, oh, oh

I thought we had it all
 (Forever, forever)
Every day 'til the end
 (Forever)
You and me, oh, oh
 (Forever, forever, forever)
