

Nothin' in This World

Idina Menzel

Later on, when the embers cool down
When I catch my breath and look around
You were right beside me

Slow dance in the middle of a hurricane
Every worry that I had, every little pain
They just fade inside me

Lost you once, I take the blame
Climb that hill, I'll take the rain
Baby, I'm not letting go this time

After all is said and done
Baby, you're my setting sun
When we walk through fire
We'll be fine

Nothin' in this world is gonna keep me from you
No, nothin' in this world is gonna keep me from you
Nothin' in this world is gonna keep me from you
Nothin' in this world is gonna keep me from you

I remember back when the levee broke
And the words just flowed, I didn't choke
It took us too long to get it right, mm

Still feel that aching in my heart
The aftershock and the echo [stars?]
Somehow we made it through the night

Lost you once, I take the blame
Climb that hill, I'll take the rain
Baby, I'm not letting go this time

After all is said and done
Baby, you're my setting sun
When we walk through fire
We'll be fine

Nothin' in this world is gonna keep me from you
No, nothin' in this world is gonna keep me from you
Nothin' in this world is gonna keep me from you
Nothin' in this world is gonna keep me from you

Through fire, through fighting, the weight of this life
Regrets an emotion this time
Don't wanna lose you like ships in the night

Nothin' in this world is gonna keep me from you
No, nothin' in this world is gonna keep me from you
Nothin' in this world is gonna keep me from you
No, nothin' in this world is gonna keep me from you

Nothin' in this world is gonna keep me from you
Nothin' in this world is gonna keep me from you

Through fire, through fighting

Nothin' in this world is gonna keep me from you
