Idlewild

You can't always be the strange one
I'm spending you without a hope
For one
Pride in yourself into it
If you don't wanna stay
Go out into the light
You'll be better off that way

I've got no motive four people do good
Four people do good (when I see you right there)
I've got no motive four people do good
Four people do good (when I see you right there)

I know, I know, I know, I know, I know - send me downst airs

You stand there, you stand there, watch him wonder If he's wondering about the star If he's wondering where they'll make him stay If he doesn't want to stay So you'll never be alone

Hey

I've got no motive four people do good Four people do good (when I see you right there) I've got no motive four people do good Four people do good (when I see you right there)
