

## (I Am) What I Am Not

Idlewild

Calling places, collecting careless  
Sentences I write them down  
So I ignore them, and you should too, you should ignore every word  
Is calling what you can surrender  
The only way to really learn  
That the alphabet made up the words  
You could never resist to quote

If all this wisdom is true  
Then I doubt it could really have come from you

Then I am what I am not, I am what I am not  
So there must be something more then  
If I am just a thought I'm not

Faster than the destination  
Of knowing where you really are  
Is where you've always been  
Or is it where you began  
And happiness, did it happen  
Sooner than the doubt it cost you  
You learn from the mistakes that I taught you

If all this wisdom is true  
Then I doubt it could really have come from you

Then I am what I am not, I am what I am not  
So there must be something more then  
I am what I am not,  
If there's nothing more then  
I am what I am not, I am what I am not  
There must be something more then  
If I am what I am not

Then I am what I am not, I am what I am not  
There must be something more then  
I am what I am not,  
I know there's nothing more then  
I am what I am not, I am what I am not  
I know there's nothing more then  
If I am what I am not
